Prof. A. Srinivasa Rao, HOD of Pharmaceutical Chemistry, SVCP gave a seminar on 23rd December, 2017 about "DIFFERENT ANALYTICAL TECHNIQUES" to the students of M.Sc. Organic Chemistry. He discussed about different analytical techniques like X-Ray Fluorescence technique, GC, HPLC, partition, adsorption, GLC and GSC etc., He explained about the applications of these techniques. He explained that the XRF is used to determine the elemental composition of inorganic based materials. It is used for bulk chemical analysis on solids and powders. X-rays when they fall on the sample they emit fluorescent X-ray which is characteristic for those elements. He also explained about LCMS and GCMS also and their importance in research and pharmaceutical industry.
